

Endswell

Endswell is a modern, eco-friendly funeral home owned and operated by Veronica and Hunter Beattie, who are long-term residents of Orange County, NC. They started Endswell to modernize funeral care and provide eco-friendly options to this community.

Endswell is committed to elevating and modernizing funeral care, offering concierge services to the families we serve. We disclose our prices up front and never include any hidden fees. Our pricing includes everything the family needs including transportation, paperwork, death certificates, a dedicated obituary, and 24/7 support for the family. Discounts are available and provided on an at-need basis.

What is a Modern Funeral Home?

A modern funeral home is committed to convenience, concierge care, price transparency, affordability, and environmentally-friendly services. Unlike many traditional funeral homes, Endswell is bringing funeral care into the 21st century. Our registration process is simple and convenient. We disclose our prices on our website and there are no hidden fees. We handle every aspect of the process and serve as an advocate for the family. Endswell is committed to cultivating sustainable funeral practices that align with our community's values and our shared belief in environmental sustainability.

Aquamation \$3500

Endswell is the only Aquamation facility in the Triangle. Aquamation is a new type of cremation that uses 1/10th of the energy as fire cremation and doesn't produce any greenhouse gas emissions. Rather than using extremely high temperatures and fire, Aquamation uses an alkaline solution that circulates around the body. The family receives an urn with ashes, just as they do with regular cremation. We believe that Aquamation is the future of funeral care and that it is a gentle, simple, and respectful choice for our families and the planet.

Natural Burial \$3000

Endswell is part of the green burial movement, which seeks to reimagine funeral practices that are expensive, resource-intensive, and bad for the environment. Green or natural burial is practiced by the majority of people on the planet; and most of our ancestors were buried without the use of embalming or expensive non-biodegradable caskets. Prices vary for local green burial plots. Endswell assists the family with every aspect of the process.

Cremation \$3000

Endswell recognizes that cremation is a popular, affordable, and convenient choice for many families. We work with a well-respected crematorium in the Triangle to provide cremation. It's called green cremation because it uses the newest technology to minimize greenhouse gas emissions and provide the lowest carbon footprint. We also purchase carbon credits to offset emissions and ensure that this service aligns with Endswell's commitment to environmental sustainability.

Concierge Care

Endswell is available 24/7 to assist families. We coordinate transportation of the deceased, file all paperwork with Vital Records and the Register of Deeds, report to the Social Security Administration, curate a custom obituary on our website, and we hand deliver the death certificates and the urn. Endswell staff meet our clients at our facility in Hillsborough or in their own home. We never require that family members travel to our location, rather we are here to accommodate your needs, whatever they may be.

The Urn Gallery

Endswell offers a carefully curated gallery of urns made by local artists. None of our urns are mass produced in factories. They are hand made by artists in our community and they reflect Endswell's commitment to quality as well as the uniqueness of each individual we work with.
